**Assignment 5: Still-life | Flower**

**Due:** Mar 23rd

**Format:** Digital | Color or B&W

*“Photography is a love affair with life”* **Burk Uzzle**

This assignment is to construct a flower still-life on location. Consider adding additional props to add additional interest. The items should relate to each other including the background and be a pleasing composition with everything in sharp focus. The background is as important as the objects in the still-life.

A still Life gives you a lot of creative control over your subject. You have time to set it up in a pleasing composition and plan for lighting, two very important aspects of this type of photography. Crop your image to 15 inches the long dimension.
